COMMERCIAL CONSTRUCTION

COMMERCIAL / OFFICE / SPECIALTY USE CONSTRUCTION

An active force in the commercial construction business, Alfa Builders is a dependable, start-to-finish source for many types of projects. We work with businesses and organizations to address specific construction requirements and follow through with attention to quality and detail at every stage. Whether your project is a plan and specification project, design-build or lease to own, Alfa Builders has the resources and financial stability to accomplish the task in a dependable and flexible manner.

Recent projects include:

ALFA INSURANCE DAY CARE BUILDING

Reminiscent of the look and appearance of Alfa Insurance's home office, the facility contains a large domed skylight (approximately 12' wide and 60' long) which provides natural lighting to the main corridor. The facility also houses classrooms for all preschool-age children as well as offices and a kitchen. Two exterior play areas wrap three sides of the building and feature large wooden play structures and covered patios.

STURBRIDGE OFFICE CONDOMINIUM

This single-structure facility is divided into four commercial office spaces. The exterior facade creates a unique entrance appearance for each separate tenant allowing each space to have its own individual style. The interior build-out was also completed by Alfa Builders for clients ranging from mortgage companies to medical billing organizations.

CHRIST COMMUNITY CHURCH

This 16,400 square-foot facility was constructed for a new church in the Hope Hull area. Under the design-build concept, and due to the limited resources available to such a young church, Alfa Builders took great pains to minimize construction costs. Through aggressive purchasing and value-conscious construction procedures, the final cost for the facility was reduced by over \$100,000 with several changes incorporated in the closing months of the job.

AMSOUTH BANK

A branch bank facility, this project included drive-thru teller windows, interior banking area, private offices for bank officials and loan officers, as well as a high security vault.
